

Curriculum Vitae

박준혁

Seoul National University (SNU)
Civil and Environmental Engineering, Class of 2022

Education

Seoul National University, Civil and Environmental Engineering (2022–Present)
Interested in Artificial Intelligence, Machine Learning, and Engineering Applications.

Research Interests

- Artificial Intelligence and Machine Learning
- Computational Engineering
- Numerical Analysis and Differential Equations
- Geotechnical Engineering
- Transportation Systems

Research Experience

Prospective Winter Research Intern under Prof. Ko Hee-dong.
Topics of interest include wave scattering, analog computing, plane-wave expansion, Bessel expansion, Helmholtz and Maxwell equations.

Teaching Experience

- Private tutor for mathematics and physics.
- Teaching Assistant for Engineering Mathematics II.

Projects & Leadership

- President of Fantasy Game, a university strategy/game club.
- Designed and operated multiple original strategy and survival games.
- Organized large-scale club events, tournaments, and educational activities.

Technical Skills

Programming: Python, Java, C++, MATLAB

Tools: Spyder, Jupyter Notebook, Google Colab, IntelliJ IDEA, CLion, Vivado

Data & Productivity: Excel, OneDrive, Microsoft 365

Relevant Coursework

Differential Equations, Engineering Mathematics, Geotechnical Engineering, Structural Analysis, Machine Learning, Data Structures, Probability and Random Variables, Computer Programming, Artificial Intelligence Transportation Systems

Awards & Scholarships

- Recipient of the Cho Nam-il Scholarship (full tuition support).
- Graduated from Daejeon Science High School for the Gifted.
